

AUTOSPLIT: 340B Processing & Management

Specification Sheet

AutoSplit® 340B software is the market leader in maximizing 340B savings, with more customers than any other vendor. Talyst's powerful AutoSplit 340B software automatically monitors all pharmaceutical usage in 340B-eligible healthcare organizations, maximizing returns on qualified transactions while maintaining compliance.

AUTOSPLIT 340B: Optimizing Savings and Compliance

AutoSplit 340B works in hospitals, clinics and with contract pharmacies to maximize savings across 340B channels. AutoSplit also has the industry's most comprehensive audit and compliance tools so you are always ready for a possible audit. Talyst also offers the industry's only fully-managed 340B program, where Talyst's 340B experts manage the program day-to-day, maximizing savings and allowing pharmacy personnel to focus on patient care and safety.

Automates 340B Processing

- Creates replenishment orders, credit/re-bills and penny saver orders, based on previous eligible dispenses
- Manages multiple accounts or departments from a centralized database
- Carves out non-contract, Medicaid and Orphan Drugs
- Flexible ordering process:
 - EDI links directly to wholesaler ordering systems
 - Automated processing, ordering and reconciliation saves staff time

Audit Ready

- Each dispense and purchase tracked by unique record ID – everything is tracked and stored
 - Facilitates both comprehensive audits and increasingly common “spot checks” of single medications
- Enables verification of data for adherence to compliance standards
- Verify Split Tool allows in depth analysis of transactions to justify each split
- Audit data can be exported to a spreadsheet for further analysis

Maximizes Discounts

- Custom cross-reference of multiple charge codes and doses using our unique, advanced NDC matching software
- Handles multiple facilities and contract pharmacy
- Allows for separate transaction files from multiple departments to utilize every 340B opportunity
- Tracks items with invalid NDC for future utilization
- Unique “generic grouping” functionality maximizes savings on generics

Fully-Managed Option

- Let Talyst 340B experts handle day-to-day 340B administration, freeing pharmacy personnel to focus on patient care and safety
- Boost savings by letting experts administer your 340B program
- Comprehensive reporting and updates keep you on top of program and results
- Periodic internal audits both spot potential compliance issues and demonstrate vigilance
- Generally appropriate for larger hospitals and IDNs
