

INSITE: Medication Management for Corrections

INSITE | CORRECTIONS

Talyst, a leader in pharmacy automation, has created the first medication management system designed specifically for Corrections. Talyst InSite™ enables patient-specific medication dispensing right at the facility. It delivers dramatic cost savings by reducing medication waste, saves valuable nursing staff time, and improves patient safety.

The InSite Solution

The InSite™ system puts a secure, automated remote dispensing unit at the correctional facility, and uses powerful software to ensure the right medications are available on-demand, accessed by the right personnel, and packaged for a specific patient. The process is automated, accurate, and can quickly package pharmacist-approved medications before each medication pass, or on-demand to facilitate new patients, First Doses, and PRNs.

INSITE: Streamlining the Medication Dispensing Process

ELIMINATES WASTE & SAVES TIME

With InSite™, oral solid medications are dispensed only as needed and for a specific patient. It significantly lowers medication errors and waste while expediting the entire administration process. InSite uses powerful software to ensure the right medications are given to the right patient, in the right dose, and at the right time.

InSite enables automated and accurate dispensing:

- Medications arrive at the facility in sealed, pharmacist-approved canisters and are placed in a secure remote dispensing unit
- Medications are dispensed only as needed, and for a specific patient or medication pass
- Patient location on the medication packet is always based on the latest data—even if they are off-site, in transit, or at court
- InSite provides down-to-the-dose accountability at each facility, reducing waste, diversion, and the use of medications as currency

With InSite, medication orders are transmitted from the facility to the pharmacist for clinical review. After approval, the medications are immediately available at the correctional facility and dispensed from the InSite remote dispensing unit with patient-specific packaging.

InSite gives your nursing staff the time to perform other tasks:

- Can eliminate blister pack-related storage, access, and inventory management concerns
- Dramatically reduces the time needed to prepare for scheduled medication passes
- Eliminates the need to perform time-consuming narcotics counts
- Works with existing information systems, basing its automated inventory replenishment requests on actual medication usage
- Maximizes staff efficiency with an intuitive user interface and guided workflow

INSITE: Improves Overall Quality of Care

IMPROVES PATIENT SAFETY

InSite enables faster First Doses, STAT orders, and accurate, timely medication passes. The InSite Remote Dispensing System stores up to 500 different types of medications in a single, secure dispensing unit. It provides automated, on-demand compliance packaging for oral solid medications prior to administration.

InSite delivers patient-specific compliance packaging

- Delivers patient-specific packaging with customizable, nurse-friendly labels
- Packages up to 60 doses per minute with a broad variety of sorting options
- Allows automatic inventory monitoring and lot and expiration tracking
- Supports an Automatic Canister Recognition System for added safety
- Maximizes staff efficiency with an intuitive user interface and guided workflow
- Restricts access to stored medications with password-protection and locking metal doors

About Us

Talyst is engineering the safer pharmacy. The company was founded in 2002 to provide easy-to-use, automated medication management systems to acute care hospital pharmacies. The following year, Talyst launched AutoPharm®, the innovative software platform designed to integrate medication storage, inventory, ordering, barcoding, and clinical systems.

By 2009, Talyst had installed automated systems in close to 400 acute care hospitals and integrated healthcare companies. By leveraging our expertise in acute care pharmacy automation, we are now building unique systems designed specifically to meet the needs of long-term care facilities and correctional institutions. Talyst is dedicated to delivering world-class software and proven hardware components to enhance efficiency, provide greater inventory control, and improve patient safety in all environments.

OUR SERVICE COMMITMENT

Talyst is committed to our customers, and dedicated to delivering the highest levels of satisfaction in the implementation of our products. We apply ISO 9000 principles to respond to the needs of our customers with proven solutions, targeted training, and complete support.
