

INSITERX: Medication Management for Long-Term Care

INSITERX™

The InSiteRx™ Remote Dispensing System by Talyst designed specifically for long-term care, enables secure, automated medication dispensing on-site at long-term care facilities to deliver pharmacist-approved, on-demand medication 24/7. InSiteRx improves patient safety, reduces medication waste, and saves nursing time.

The InSiteRx Solution

The InSiteRx Remote Dispensing System is changing the way medications are dispensed in long-term care facilities. The InSiteRx system places a secure, automated remote dispensing unit at the long-term care facility. Medications are on-hand and accessible to nurses 24/7 for improved quality of care. The process is automated, accurate, and can quickly package pharmacist-approved medications before each medication pass, or on-demand to facilitate new residents, First Doses, STAT orders, and PRNs.

INSITERX: Streamlining the Medication Dispensing Process

ELIMINATES WASTE & SAVES TIME

InSiteRx can virtually eliminate medication waste by dramatically reducing or eliminating the need to create time-consuming, waste-prone blister packs. The average InSiteRx canister holds about 300 doses, and can be filled and processed in about the same time it takes to create a single 30-day blister card.

InSiteRx enables automated and accurate dispensing:

- Medications are dispensed only as needed, in patient specific multi-dose packets
- Changes in prescribed medications or patient residency will no longer produce unused blister cards that need to be destroyed or returned
- It reduces the number of medication deliveries and expensive special courier runs required
- InSiteRx can provide inventory and dispensing information for down-to-the-dose accountability

With InSiteRx, medication orders are transmitted to the pharmacist for clinical review. After approval, the medications are immediately available at the long-term care facility and dispensed from the InSiteRx remote dispensing unit with patient-specific packaging.

InSiteRx gives your staff the time to perform other tasks:

- Can eliminate blister pack-related storage, access, and inventory management concerns
- Dramatically reduces the time needed to prepare for scheduled medication passes
- Eliminates the need to perform time-consuming narcotics counts
- Works with existing information systems, basing its automated inventory replenishment requests on actual medication usage

INSITERX: The Right Medication to the Right Patients

IMPROVES PATIENT SAFETY

InSiteRx enables faster First Doses, STAT orders, and accurate timely medication passes. The InSiteRx Remote Dispensing System stores up to 240 different medication types in a single, remote dispensing unit. It provides automated, on-demand compliance packaging for oral solid medications prior to administration.

InSiteRx is a secure system, ensuring medication accuracy:

- Before delivery, each canister is filled, security sealed, checked and signed by the pharmacist
- Allows automatic inventory monitoring and lot and expiration tracking
- Supports an Automatic Canister Recognition System for added safety
- Restricts access to stored medications with password-protection and locking metal doors
- Packages up to 60 doses per minute with a broad variety of sorting options
- Enables additional nursing time for patient safety issues such as fall-prevention

About Us

Talyst is engineering the safer pharmacy. The company was founded in 2002 to provide automated medication management systems to acute care hospital pharmacies. The following year, Talyst launched AutoPharm®, the innovative software platform designed to integrate medication storage, inventory, ordering, barcoding, and clinical systems.

By 2010, Talyst had installed automated systems in close to 500 acute care hospitals and integrated healthcare companies. By leveraging our expertise in acute care pharmacy automation, we are now building unique systems designed specifically to meet the needs of long-term care facilities and correctional institutions. Talyst is dedicated to delivering world-class software and proven hardware components to enhance efficiency, provide greater inventory control, and improve patient safety in all environments.

OUR SERVICE COMMITMENT

Talyst is committed to our customers, and dedicated to delivering the highest levels of satisfaction in the implementation of our products. We apply ISO 9000 principles to respond to the needs of our customers with proven solutions, targeted training, and complete support.
