

AUTOSPLIT: 340B Processing & Management

Specification Sheet

AutoSplit® 340B software is the industry-leader in 340B purchase order splitting. The automated system provides full audit trails for all eligible 340B dispenses and splits. AutoSplit is flexible, easy to implement, and can maximize 340B savings while reducing program administration hours. It works with multiple wholesalers simultaneously, and has exportable reports to help maintain regulatory compliance.

AUTOSPLIT: Centralize Your 340B Contract Administration

Talyst AutoSplit® 340B software automatically monitors all pharmaceutical usage in a 340B-eligible healthcare organization to provide maximum return on all qualified transactions. The easy-to-use split-billing software monitors data from your current pharmacy and hospital information systems and your existing wholesale vendors, and creates replenishment orders based on eligible 340B transactions.

Talyst is the market leader in automated 340B processing. Our powerful AutoSplit software enables you to consolidate your data and work simultaneously with multiple vendors. It allows you to store and access as much historical data as you want, and our comprehensive reporting features make it easy to export the data you need to an Excel spreadsheet.

Streamlines 340B Processing

- Creates replenishment orders or credit/ re-bill reports
- Integrates with most major wholesale vendors and pharmacy information systems
- Manages multiple accounts from a centralized database
- Works with 340B or non-340B contracts
- Customizable to exclude generic groups and specific vendor item numbers

Maximizes Discounts

- Creates replenishment orders based on eligible transactions
- Finds and utilizes all available claims using our unique, advanced NDC matching software
- Operates with most major wholesale vendor databases
- Monitors all medication usage to utilize every contract opportunity

Optimizes Inventory

- Eliminates the costs associated with excess inventory
- Reduces the amount of physical inventory space required
- Eliminates the need to keep a separate 340B inventory

Reduces Staff Time

- Automates 340B program administration
- Simplifies stocking and picking tasks
- Saves staff time by managing a single inventory

Simplifies Audits

- Enables improved data accuracy to verify adherence to standard processes
- Provides a transaction-based system with a before/ after snapshot
- Quickly accomplishes audit process by exporting data requested by auditor
